

Quotation of Portable Machine Tools

Product Description

Our comprehensive portable maintenance line includes a full range of heavy machinery repair tools. For bore repair, we offer portable boring machine, portable line boring machine, mobile line boring machine portable boring machine, and the XDT50 High-speed Welding All-in-one Machine—a versatile portable line boring machine and bore welding solution, with the automatic portable line boring and welding machine model available as portable line boring machine for sale.

For flange and shaft work, our Manual Flange Processing Machine (also a flange facing machine and portable flange facing machine) is listed as flange-facing-machine-for-sale, alongside the Automatic Soldering Machine and automatic wire soldering machine. We also provide Portable CNC Thread Milling Machine, Portable Shaft End Machine (functioning as a portable shaft lathe and portable shaft turning lathe), plus portable lathe machine and portable lathe machines tool for on-site turning.

For assembly tasks, our sleeve pressing machine (manual/electric) and Portable Chain Press (also a track pin press) complete the set, enabling efficient disassembly and reassembly of engineering machinery components.

Boring Machine

Our XDT series includes XDT40/XDT60/XDT90/XDT110 portable boring machine models, covering compact to heavy-duty on-site repair needs. The XDT50 series features a High-speed Welding All-in-one Machine and automatic portable line boring and welding machine, acting as a versatile portable line boring machine and bore welding solution. All models are robust mobile line boring machine portable boring machine options, ideal for excavator and heavy machinery bore repair, available as portable line boring machine for sale with precise machining and field operation convenience.

flanges and bores:

1.Boring Machine: Transforms rough, corroded bores into precision-machined, smooth surfaces, restoring dimensional accuracy without disassembly.

2.Integrated Welding Machine: Repairs rusted, damaged flanges by first filling worn areas, then machining to a like-new finish—ideal for heavy machinery and industrial components.

Both machines ensure reliable, high-quality restoration, making them essential tools for construction, mining, and oil & gas equipment maintenance.

Flange machine

We offer a full range of flange facing machine models, from hand-cranked to heavy-duty portable options. Our XDFC250 is a reliable Manual Flange Processing Machine, ideal for small-scale flange repair. The XDFC300, XDFC610, XDFC1000, XDFC2000, and XDFC4000 are powerful portable flange facing machine solutions, designed for on-site machining of large flanges without disassembly. All models are available as flange-facing-machine-for-sale, delivering precise facing and restoration for industrial flanges in construction, oil & gas, and marine applications.

Finished product

Our hand-cranked and portable flange facing machines deliver outstanding on-site restoration for damaged flanges:

1.Hand-cranked model: Repairs worn, uneven flange faces precisely, turning rough, pitted surfaces into smooth, dimensionally accurate finishes without disassembly.

2.Portable model: Efficiently handles corroded, rusted flanges, restoring sealing surfaces to like-new condition for heavy-duty industrial applications.

Both machines ensure reliable, high-precision flange repair, ideal for construction, oil & gas, and marine equipment maintenance.

Internal hole welding and shaft end machine

We offer a complete range of on-site repair machines for internal hole and shaft maintenance. Our Automatic Soldering Machine delivers precise inner hole welding to repair worn bores efficiently. For shaft repair, our XDZ300 and XDZ500 models are reliable Portable Shaft End Machine options, functioning as a portable shaft lathe and portable shaft turning lathe to restore shaft dimensions without disassembly. We also provide a matching sleeve pressing machine for complete component disassembly and reassembly, making our equipment ideal for heavy machinery, engineering, and industrial field maintenance.

Hydraulic Equipment

We offer reliable hydraulic equipment for heavy machinery maintenance:

1.XDY70 Sleeve Pressing Machine: Available in manual and electric versions, this portable press is designed for installing and removing sleeves and bushings on-site, delivering strong hydraulic force for efficient disassembly and reassembly.

2.XDY100 Portable Chain Press: A robust hydraulic track pin press, ideal for disassembling and assembling excavator track chains. It's portable, easy to operate, and perfect for field repair of construction machinery components.

Both machines are durable, compact, and essential tools for on-site maintenance teams.

**Quality, price, time and service is the tenet of our business.

Product Application

Our complete set of portable repair equipment is specifically designed for on-site repair scenarios in industries such as construction machinery, energy, shipbuilding, and mining. It enables high-precision repairs without disassembling large equipment:

- 1. For construction machinery repair:** After wear on the shaft holes and pin holes of excavators, loaders, and cranes, portable boring machines and integrated boring-welding machines are used for on-site welding and boring, quickly restoring component precision. Track link and pin disassembly is completed using portable chain pressing machines and sleeve pressing machines, avoiding the need for the entire machine to be returned to the factory.
- 2. For corrosion and damage to the sealing surfaces of pipeline flanges and valves in the oil and gas industry:** On-site milling using manual flange processing machines and portable flange lathes restores sealing performance. Critical shaft components are machined online using portable shaft end lathes.
- 3. For marine and marine engineering:** When the internal holes and threads of marine engines and deck machinery are damaged, portable CNC thread milling machines and automatic internal hole welding machines can operate inside the ship's hold, precisely repairing threads and holes, ensuring the ship's continued operation and safety.
- 4. In mining and heavy equipment:** large components of mining machinery and tunnel boring machines can be machined on-site at the mine after wear, significantly reducing downtime and lowering transportation and disassembly costs.
- 5. In power and energy equipment:** the shaft holes and flange faces of steam turbines and generators can be repaired using portable boring and welding machines and flange processing machines, enabling high-precision machining on-site at the power plant and avoiding the high costs and risks associated with disassembling and transporting the equipment.

Quality, price, time and service is the tenet of our business.
Credit, reposal, negotiation and cooperation is our standard.

Excavator Repair Solution

-Excavator Repair

This complete portable machinery lineup is your all-in-one answer to excavator maintenance, designed to restore damaged equipment to full operation without disassembly or factory return:

Step 1: Address Core Wear Issues

*Start with common excavator problems like damaged track chains, worn bushings, corroded bores, or stripped threads.

Step 2: Targeted Repair Process

*Use the chain press machine to safely disassemble worn track links and pins.

*Deploy the pressure machine to remove old bushings and install new ones, restoring tight, precise fits.

*Fix corroded/worn bores with the internal hole repair welding machine and portable boring machine, returning holes to exact dimensional tolerances.

*Repair worn shaft ends with the portable shaft end machine.

*Finish with the high-speed welding all-in-one machine for quick defect repairs, manual flange processing machine to restore sealing surfaces, and portable CNC thread milling machine to fix damaged threads.

Step 3: Return to Full Operation

*The excavator is fully restored to working condition, ready to get back to the job site.

-Key advantages of our products:

- 1. Minimize downtime:** On-site repairs can be completed within days, not weeks.
- 2. Reduce costs:** Extend component lifespan without replacing entire parts.
- 3. No disassembly required:** Repairs can be performed directly on the machine, avoiding costly disassembly and reassembly.
- 4. One-stop solution:** Covers all repair needs from track chains to flanges and threads.

Quality, price, time and service is the tenet of our business.
Credit, reposal, negotiation and cooperation is our standard.

Customer usage scenarios

Here are direct results from our customers using our portable machining equipment:

1.Agricultural Equipment Maintenance

Our machines excel at repairing tractor and farm machinery components. Customers report that our portable presses and boring equipment allow for quick on-site repairs of sleeves and bushings, eliminating the need to transport heavy equipment to a workshop. The result? Significantly reduced downtime and maintenance costs for farmers.

2.Industrial Flange & Pipe Restoration

Clients in the oil, gas, and water industries rely on our flange facing machines and thread milling equipment to repair damaged flanges and threads. They consistently praise the precision and smooth finish achieved after on-site machining, which restores the integrity of sealing surfaces and prevents leaks.

3.Reliable On-Site Precision

Across the board, customers appreciate the portability and accuracy of our tools. They confirm that our equipment delivers professional-grade results directly at the job site, leading to longer lifespan of components and substantial savings compared to replacing entire parts.

CUSTOMER USE

FAQ

1. Are these machines portable enough for on-site repairs?

Yes! All our machines are designed for maximum portability—they feature compact frames, lightweight

Quality, price, time and service is the tenet of our business.

Credit, reposal, negotiation and cooperation is our standard.

ZHENGZHOU LERFORD MACHINERY EQUIPMENT CO.,LTD

Tel: 86 371 55960109

structures, and wheeled/hand-carry options. You can easily transport them to construction sites, farms, or industrial fields without needing to disassemble large equipment.

2. Can these machines repair different types of components?

Absolutely. Our product line covers a full range of repairs:

- 1) Portable boring & welding machines: Fix worn shaft holes, pin holes, and damaged bores
- 2) Flange processing machines: Restore corroded flange sealing surfaces
- 3) Thread milling & shaft end machines: Repair threads and worn shaft ends
- 4) Sleeve pressing & chain presses: Install/remove sleeves, bushings, and track chains

3. Do I need professional training to operate these machines?

No, our machines are built with user-friendly controls and simple setups. Most models come with intuitive operation panels and clear installation guides, so even on-site maintenance teams can quickly master them with basic training.

4. What industries are these machines suitable for?

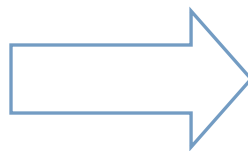

They're widely used in construction machinery (excavators, loaders), agricultural equipment, oil & gas, marine, and mining industries—perfect for any scenario where on-site, non-disassembly repair is needed.

5. How do these machines reduce maintenance costs?

By enabling on-site precision repair, you avoid the high costs of transporting heavy equipment to workshops or replacing entire components. Our machines extend the lifespan of worn parts, cutting downtime and replacement expenses significantly

Product Packaging & Shipping

We offer global air freight express service (via DHL, FedEx, UPS, or TNT) for all portable industrial repair equipment, ensuring fast and safe delivery to your doorstep. Delivery typically takes 7-15 business days to most countries, and we provide all necessary customs documents (commercial invoice, packing list, certificate of origin) to assist with customs clearance. Production cycle is 7-20 business days, depending on the model and order quantity, allowing you to quickly obtain on-site repair equipment and minimize downtime.

Quality, price, time and service is the tenet of our business.

Credit, reposal, negotiation and cooperation is our standard.

Company Introduction:

Zhengzhou Runxiang Machinery Equipment Co., Ltd. is an enterprise focusing on the research and development, production and sales of agricultural and food processing equipment. Over the years, it has been committed to providing customers with high-quality, high-performance equipment and perfect solutions. The company has a team of professional engineers, technicians and sales staff who have rich experience and expertise in their respective fields.

In terms of research and development, the company continues to invest a lot of resources, pays attention to the latest technology and market demand in the industry, and has established cooperative relations with many scientific research institutions and universities at home and abroad to jointly carry out technical research and product innovation. Through continuous efforts, the company has launched a series of advanced equipment with independent intellectual property rights.

In the production process, the company strictly follows the international quality management system, from the procurement of raw materials to the assembly and testing of products, every link is strictly controlled to ensure the stable and reliable quality of the products. The company has a modern production base and advanced production equipment, which can meet the customized needs of different customers for equipment.

How about after sales service:

After-sales service policy

1. After receiving payment from customers , sales should reconfirm the basic requirements of the machine configuration, voltage hertz, accessories and other basic requirements as soon as possible, and then send a purchase order to the workshop as soon as possible in order to save time of customers.
2. Make sure to keep the pictures before and after the packaging before shipping, and reconfirm whether the shipping list is consistent with the purchase order and the customer's needs.
3. After receiving the bill of lading, prepare the packing list and invoice for customs clearance and other customs clearance documents that the customer may need as soon as possible.
4. Every one week, two weeks and or one month (determined by the voyage), follow up the freight forwarder to check the latest route of the customer's cargo and inform the customer about the newest arrival time.
5. Please remind customers to bring customs clearance information to the freight forwarder to prepare for customs clearance ten days before the arrival of the goods.
6. Please contact customers in time to follow up the latest progress of customs clearance and transportation, remind customers to check whether the packaging is in good condition, and protect the packaging during transportation to avoid damage to the machine.
7. Must contact customers to guide the wire connection,using and precautions before and during operation.
8. After sales follow up must be provided every month, and any after-sales problems are reported and resolved in time. If the after-sales problems are not resolved as required, according to the seriousness of the circumstances, sales will be warned, punished, and expelled in accordance with the company's rules and regulations.

9.If you have any other useful suggestion about our after sales service,welcome to contact us at susan@pelletmilling.com any useful suggestion will get extra \$100 from our company as gift,welcome everyone!

How about the customer feedback?

RUNXIANG MACHINERY HAS COOPERATED WITH THE MINISTRY OF AGRICULTURE OF NIGERIA, THE MINISTRY OF AGRICULTURE OF GHANA, THE MINISTRY OF AGRICULTURE OF CONGO, THE NATIONAL DEVELOPMENT AND REFORM COMMISSION OF KENYA, THE JAMAICA OFFICE OF THE UNITED NATIONS CHARITY FEDERATION, THE MOROCCAN FOOD ASSOCIATION, THE NATIONAL STONE ADMINISTRATION OF COTE D'IVOIRE AND OTHER DOZENS OF NATIONAL PROCUREMENT PROJECTS. WE HAVE EXPORTED TO 158 COUNTRIES AND REGIONS IN THE WORLD.THERE HAVE 3 OVERSEAS WAREHOUSES AND OFFICES IN KENYA, MOROCCO AND NIGERIA. WELCOME TO VISIT AND DISCUSS!

OUR ADVANTAGES AND PROMISE:

- 1.TWO YEARS GUARANTEE WITH ALL OF OUR MACHINE(IT DOES NOT INCLUDE WEAR AND CONSUMABLE PARTS).
- 2.FREE ONLINE AFTER SALES SERVICE FOREVER.
- 3.ACCESSORIES ARE ALWAYS AVAILABLE.
- 4.OVERSEAS WAREHOUSE SPOT SERVICE IN KENYA, MOROCCO AND NIGERIA.
- 5.DDP DOOR-TO-DOOR SERVICE IN 98 COUNTRIES INCLUDING EUROPE, AMERICA, SOUTHEAST ASIA, THE MIDDLE EAST, AND AFRICA.
- 6.WE CAN CUSTOMIZE THE PRODUCTS AND VOLTAGES THAT CUSTOMERS NEED ACCORDING TO THEIR SPECIFIC NEEDS, AND CAN ACCEPT OEM.
